

Testimonial

Hubert Kiehl, Intellectual Property Director at Groupe SEB

Groupe SEB chose Questel to build its patent workflow management solution for the following reasons:

The company:

- Large and solid technical team
- Reliable and secure partner with long-term experience
- High level of security
- 30+ years of expertise in:
 - IP information
 - Engineering information (major Patent Offices + industry)
- Solution used by a long list of large firms

The benefits:

- Watch results easier to read
- Better geographical scope of watches: RU, CN, KR, BR...
- Faster and more effective communication between departments
- Computer assisted indexing of patent documents
- Full text keyword searching
- Text & drawings side by side more efficient
- Much greater flexibility in daily IP-related management
- Developments accessible by all PatentExaminer users
- Secured long term maintenance

The solution:

- Data offered are well structured and fully standardized, avoiding issues linked to format changes and development lags
- Very powerful and sophisticated Intellixir analytical module which allows us to analyze market shifts
- Ability to index custom fields and data
- Fully automated selective dissemination of watch results
- Ability to attach any file in any format
- Customized automated event of alerts delivery to workfiles
- Updating option (of existing families)
- Copy/cut/paste option between workfiles & folders
- Ranking capability
