Exporting QPAT Results to PatentExaminer	P. 2

Features

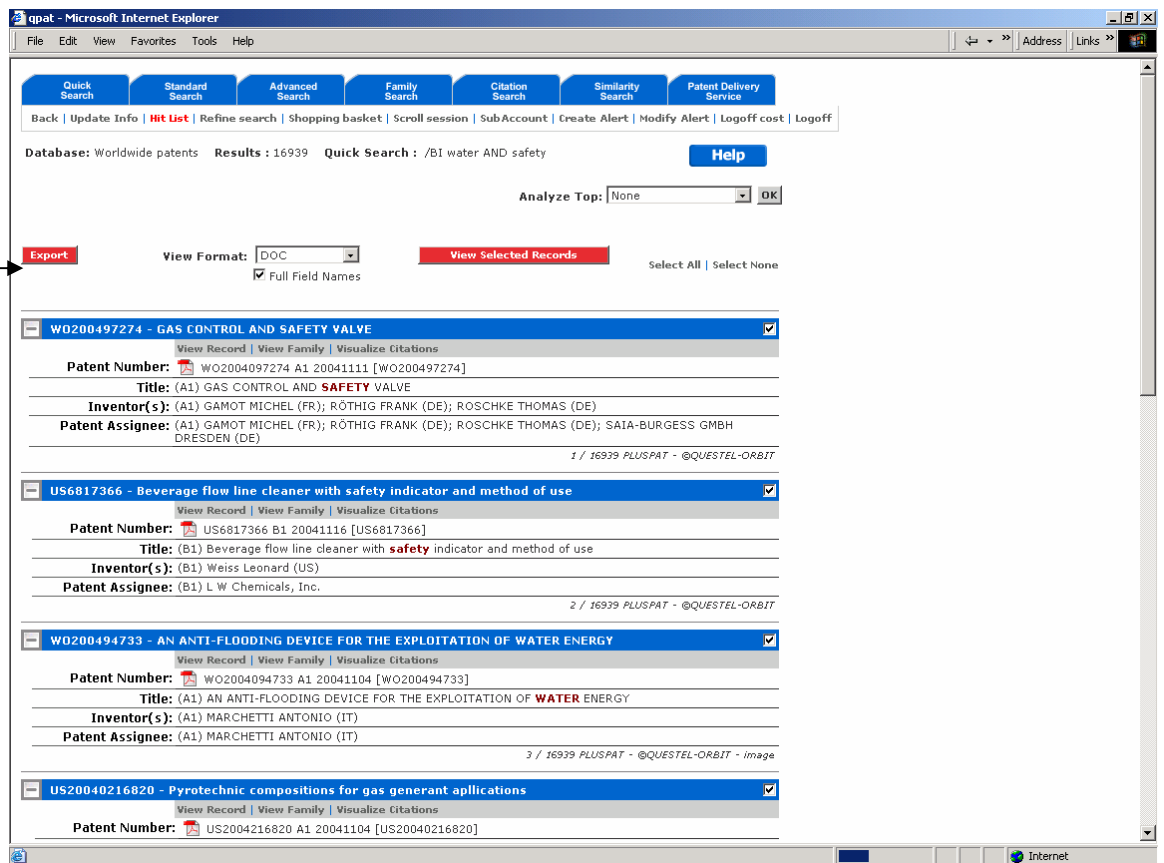

Questel•Orbit QPAT users may now export QPAT search results to PatentExaminer. With PatentExaminer, offline viewing and analysis of full-text patents and facsimile copies is facilitated with side-by-side viewing of full-text records and PDF copies with your web browser.

- ✚ User-controlled term highlighting
- ✚ Text mapping, sorting, and filtering
- ✚ Document rating and annotating capabilities

Exporting QPAT Results to PatentExaminer

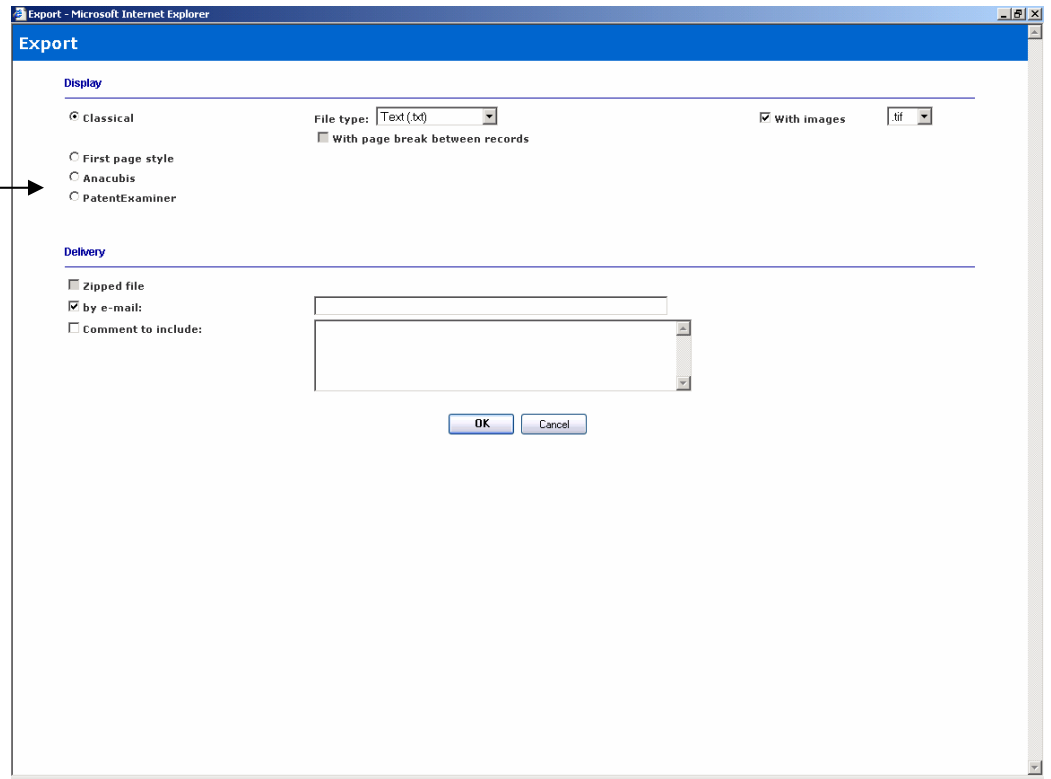

Results from a search of the PlusPat file can be easily exported into PatentExaminer. After a search in PlusPat, select up to two hundred records from the hit list display.

Click EXPORT →

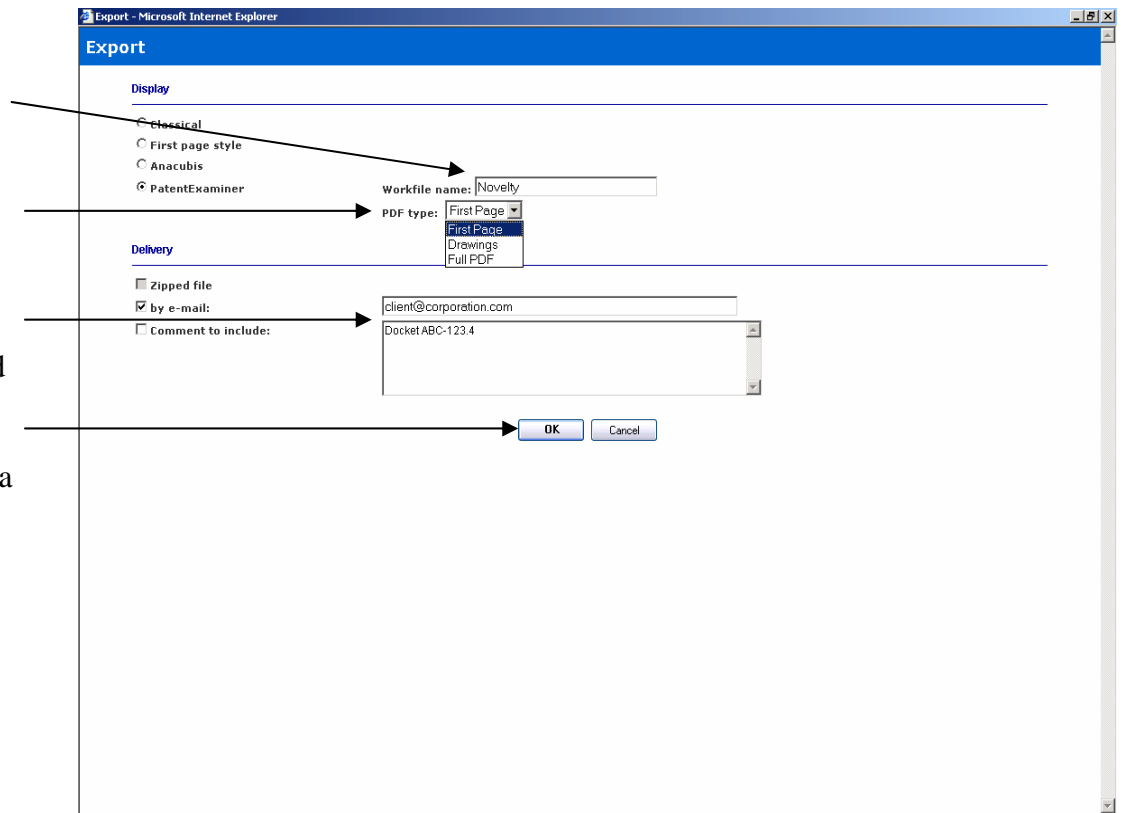

The screenshot shows a Microsoft Internet Explorer browser window displaying the QPAT search results page. The browser title is 'qpat - Microsoft Internet Explorer'. The page has a navigation bar with buttons for 'Quick Search', 'Standard Search', 'Advanced Search', 'Family Search', 'Citation Search', 'Similarity Search', and 'Patent Delivery Service'. Below the navigation bar, there are links for 'Back', 'Update Info', 'Hit List', 'Refine search', 'Shopping basket', 'Scroll session', 'Sub Account', 'Create Alert', 'Modify Alert', 'Logoff cost', and 'Logoff'. The main content area shows 'Database: Worldwide patents', 'Results: 16939', and 'Quick Search: /B1 water AND safety'. There is a 'Help' button and an 'Analyze Top' dropdown menu set to 'None'. Below this, there is an 'Export' button (highlighted by an arrow from the text 'Click EXPORT'), a 'View Format' dropdown set to 'DOC', and a 'View Selected Records' button. There are also 'Select All' and 'Select None' options. The search results are displayed in a list with checkboxes. The first result is 'WO200497274 - GAS CONTROL AND SAFETY VALVE'. The second is 'US6817366 - Beverage flow line cleaner with safety indicator and method of use'. The third is 'WO200494733 - AN ANTI-FLOODING DEVICE FOR THE EXPLOITATION OF WATER ENERGY'. The fourth is 'US20040216820 - Pyrotechnic compositions for gas generant applications'. Each result entry includes a 'View Record' link, a 'View Family' link, and a 'Visualize Citations' link. The patent details for each entry are shown below the title, including the patent number, title, inventor(s), and patent assignee.

Select PatentExaminer

1. Name the Workfile
2. Select the PDF type
First Page only
Drawings only
Full PDF
3. Enter an email address
and comments, if desired
4. Click OK
An email will be sent with a
link to the PatentExaminer
login page

PatentExaminer is a powerful patent portfolio management system with analysis and organizing capabilities, and data encryption for secure data transmission and access.

Groupware features provide corporate-wide access to collective knowledge making it the ideal tool for collaborative activity in innovative companies.

Build and organize patent portfolios through the Web

Create and name an unlimited number of workfiles

Archive an unlimited number of records in each workfile
